

SELF-DRIVE MOBILITY

PRIVACY POLICY

Customer & Vehicle-Partner Data Protection Framework

Effective Date: 9 August 2026

Version: 1.0

This Privacy Policy explains how ZibaGo collects, uses, stores, protects and shares personal information in connection with its self-drive vehicle rental, booking, customer verification, vehicle-partner and related digital services.

Important: This document is a business-ready draft intended for customization and legal review before publication. Replace the bracketed contact/legal-entity fields with ZibaGo's actual details.

1. Introduction and Purpose

ZibaGo (“ZibaGo”, “we”, “us” or “our”) operates a self-drive mobility and vehicle-rental service through which customers may discover, reserve, collect, use and return vehicles, and through which vehicle owners or partners may make eligible vehicles available for rental. This Privacy Policy describes how ZibaGo handles personal data connected with those activities.

ZibaGo recognizes that personal information must be handled responsibly. Our objective is not merely to collect information for commercial purposes, but to collect and process information that is reasonably necessary to provide a safe, accountable and legally compliant rental ecosystem.

In particular, ZibaGo may need to verify the identity, age, driving eligibility and authenticity of a prospective customer before allowing access to a vehicle. These measures help protect customers, vehicle owners, ZibaGo, employees, service providers and the wider public from fraud, misuse, unauthorized vehicle use and other unlawful or unsafe activity.

2. Scope of This Policy

This Policy applies to personal data processed by ZibaGo in connection with its website, mobile or web applications, booking systems, customer-support channels, marketing channels, vehicle-partner onboarding, KYC/verification processes, rental operations, payments and other services that link to this Policy.

It applies to customers, prospective customers, authorized drivers, vehicle owners/partners, representatives, website visitors and other individuals whose personal data ZibaGo lawfully receives in connection with its operations.

This Policy should be read together with ZibaGo's Terms & Conditions, Rental Agreement, Cancellation/Refund Policy, Damage & Accident Policy, Cookie Policy (where separately published), and any booking-specific notices.

3. Legal and Regulatory Framework

ZibaGo intends to process digital personal data in accordance with applicable Indian law, including the Digital Personal Data Protection Act, 2023 (“DPDP Act”) and applicable rules, notifications and regulatory requirements as and when applicable to the relevant processing activity.

The DPDP Act establishes a framework for processing digital personal data while recognizing both an individual's interest in protecting personal data and the need to process data for lawful purposes. The Government of India published the Digital Personal Data Protection Rules, 2025, with specified provisions taking effect according to the notified enforcement timeline. ZibaGo will update its practices as applicable provisions become enforceable.

Nothing in this Policy is intended to reduce, exclude or contractually waive a right or obligation that cannot lawfully be reduced, excluded or waived.

4. Information We Collect

ZibaGo collects information that is reasonably necessary for account creation, vehicle rental, customer verification, payment, safety, fraud prevention, customer support, legal compliance and operation of the platform. Depending on the service used, the information may include:

4.1 Identity and Contact Information

Full name, mobile number, email address, date of birth or age, residential or communication address, emergency-contact details where requested, profile information and other information supplied by the individual.

4.2 Driving Licence and KYC Information

Driving licence number, licence category/class, issuing authority, validity dates, licence images or copies, identity-document information, verification results, photographs/selfies where used for identity verification, and related information necessary to establish that a person is legally and operationally eligible to rent or drive a vehicle.

ZibaGo may request additional documentation where reasonably necessary to detect identity fraud, document inconsistencies, impersonation, misuse of another person's documents or other material risk to the rental transaction.

4.3 Booking and Rental Information

Booking ID, selected vehicle, pickup and return locations, rental dates and times, rental history, mileage/odometer information, fuel information, vehicle inspection records, booking status, cancellation history, extensions, support interactions and charges associated with the rental.

4.4 Payment and Transaction Information

Payment status, transaction reference, invoice information, refund information, payment method and other transaction details. Where payment is processed by a third-party payment provider, ZibaGo may receive transaction identifiers and status information without directly receiving or storing the customer's complete card, UPI PIN, CVV or other authentication secrets.

4.5 Vehicle, Location and Telematics Information

Where a ZibaGo vehicle is equipped with GPS, telematics, connected-vehicle or similar technology, information may include vehicle location, trip/route information, vehicle status, mileage, operating events, alerts and other technical information generated by the vehicle or device.

Such information may be used for fleet management, vehicle recovery, safety, theft prevention, operational support, dispute investigation, compliance and other legitimate operational purposes. ZibaGo will seek to provide appropriate notice regarding tracking where required.

4.6 Device and Technical Information

IP address, device type, operating system, browser information, app version, approximate location derived from technical information where enabled, timestamps, crash logs, diagnostic information, identifiers and information about interactions with the website or application.

4.7 Communications and Customer-Support Information

Messages, emails, calls where lawfully recorded or otherwise documented, support tickets, feedback, complaints, photographs, videos, documents and information supplied during customer service or dispute resolution.

4.8 Information from Third Parties

ZibaGo may lawfully receive information from payment processors, identity/KYC providers, vehicle owners/partners, insurers, roadside-assistance providers, technology providers, fraud-prevention services, government or law-enforcement authorities and other service providers where necessary for the services or permitted by law.

5. Why ZibaGo Collects and Uses Personal Data

ZibaGo uses personal data for specific and proportionate purposes connected with operating a self-drive rental ecosystem. These purposes may include:

5.1 Booking and Service Delivery

Creating and managing accounts; confirming bookings; allocating vehicles; communicating pickup and return information; managing extensions; generating invoices; processing refunds; providing customer support; and fulfilling contractual or service obligations.

5.2 Identity, Eligibility and Documentation

Verifying that the person requesting a vehicle is the person represented by the submitted information; checking driving eligibility; confirming required documents; preventing impersonation; and maintaining records necessary for responsible vehicle rental.

5.3 Fraud, Scam and Misuse Prevention

ZibaGo may process identity, documentation, transaction, booking, device, vehicle and operational information to detect and prevent scams, fraudulent bookings, identity theft, document misuse, payment abuse, vehicle theft, unauthorized vehicle use, repeated violations and other unlawful or materially harmful activity.

The purpose of these controls is to protect the ZibaGo brand, customers, vehicle owners/partners, employees, service providers and the public from avoidable harm. Where appropriate and lawful, ZibaGo may refuse, suspend, restrict or review a booking or account when available information indicates a significant risk of fraud, misuse, unsafe conduct or unlawful activity.

ZibaGo does not intend to label a person a “criminal” merely because of an automated signal, complaint or unverified allegation. Where a decision materially affects a person, ZibaGo may conduct additional verification or human review where appropriate, subject to applicable law and operational requirements.

5.4 Legal and Regulatory Compliance

Maintaining records, responding to lawful requests, complying with applicable tax, accounting, motor-vehicle, insurance, consumer-protection, data-protection and other legal requirements, and cooperating with competent authorities where legally required.

5.5 Safety, Security and Vehicle Protection

Protecting vehicles and people, investigating accidents or incidents, managing roadside assistance, recovering vehicles, detecting unauthorized use, investigating damage or theft, and supporting insurance or legal processes.

5.6 Service Improvement and Analytics

Understanding how customers use the platform, diagnosing technical issues, improving booking flows, evaluating service performance and developing new features. Where analytics requires personal data, ZibaGo will seek to use appropriate safeguards and minimize the information used.

5.7 Marketing and Communications

Sending service-related communications, promotional offers, announcements and other marketing communications where permitted by applicable law and, where required, based on the appropriate consent or preference mechanism. Customers may be provided a way to opt out of non-essential marketing communications.

6. Principles of Data Minimisation and Purpose Limitation

ZibaGo seeks to collect information that is relevant to the purpose for which it is processed and to avoid unnecessary collection. Not every customer will be asked for every category of information; the data requested may depend on the vehicle, booking method, risk controls, payment method and applicable legal requirements.

Information collected for one purpose will not ordinarily be repurposed in a materially incompatible manner unless the new processing is permitted by law or otherwise appropriately authorized.

7. Consent and Other Lawful Grounds

Depending on the processing activity and applicable law, ZibaGo may process personal data on the basis of consent, performance of a contract or steps requested before entering into a contract, compliance with a legal obligation, or another lawful basis available under applicable law.

Where consent is required, ZibaGo will seek to provide clear information about the data being requested and the purpose for which it is processed. Where applicable, withdrawal of consent will be made available through a reasonable mechanism. Withdrawal of consent does not necessarily affect processing that ZibaGo is otherwise legally entitled or required to continue, including retention necessary for legal claims, fraud prevention, security, accounting or compliance.

8. Verification and Risk Management

Self-drive rental involves physical assets, road use and third-party safety. For that reason, ZibaGo may operate identity and risk-verification processes before, during or after a rental.

These processes may consider documentation consistency, account history, transaction signals, booking patterns, vehicle-use information, reports of misuse and other information reasonably available to ZibaGo. The purpose is to identify material risk, not to discriminate unlawfully against individuals.

If information cannot be verified, appears materially inconsistent, or indicates a significant safety, fraud or compliance concern, ZibaGo may request additional documentation, place a booking on hold, refuse a rental, suspend an account or take other proportionate measures permitted by law.

9. Sharing and Disclosure of Personal Data

ZibaGo may disclose personal data only where reasonably necessary for the purposes described in this Policy, for service delivery, for protection of rights and property, or where required or permitted by law. Potential recipients include:

9.1 Vehicle Owners and Rental Partners

Where a vehicle is supplied by a vehicle owner or partner, ZibaGo may share information necessary to fulfil the booking, verify the renter and manage the rental, subject to applicable privacy and contractual requirements.

9.2 Payment and Financial Service Providers

Payment gateways, banks, financial institutions and refund/settlement providers may process transaction information required to complete payments and refunds.

9.3 KYC, Identity and Fraud-Prevention Providers

Specialized verification and fraud-prevention service providers may receive information necessary to perform identity/document verification or risk checks.

9.4 Technology, Hosting and Communication Providers

Cloud hosting, databases, analytics, customer-support systems, SMS/email/WhatsApp communication providers, mapping services, software providers and other technology partners may process information on ZibaGo's behalf where necessary to provide the service.

9.5 Insurance, Roadside and Vehicle-Service Providers

Where necessary for an incident, repair, claim, roadside assistance or vehicle-service event, relevant information may be shared with insurers, workshops, towing/roadside providers and other operational partners.

9.6 Government, Law Enforcement and Legal Authorities

ZibaGo may disclose information when required by applicable law, court order, lawful government request, regulatory requirement, investigation, or where reasonably necessary to protect the safety, rights or property of ZibaGo, customers, vehicle owners/partners or other persons.

9.7 Business Transactions

If ZibaGo undergoes a merger, acquisition, restructuring, financing, sale of assets or similar transaction, relevant information may be transferred as part of that transaction subject to applicable law and appropriate safeguards.

10. Data Processors and Service Providers

Where third-party providers process personal data for ZibaGo, ZibaGo seeks to select providers appropriate to the nature of the service and expects them to maintain suitable confidentiality and security measures. Providers may process data only for authorized purposes and as permitted by their agreements and applicable law.

11. International or Cross-Border Processing

Some technology, cloud, payment, analytics or other service providers may process information outside India. Where personal data is transferred or made accessible across borders, ZibaGo will take steps required by applicable law and applicable government directions or restrictions.

12. Data Security

ZibaGo seeks to implement reasonable technical and organizational safeguards designed to protect personal data against unauthorized access, alteration, disclosure, misuse, loss or destruction. Depending on the system, safeguards may include access controls, authentication, encryption where appropriate, secure hosting, logging, backups, role-based permissions, vendor controls and security monitoring.

No internet-based service can guarantee absolute security. Customers should use strong passwords where applicable, avoid sharing login credentials, and promptly report suspected account compromise or unauthorized activity.

13. Personal Data Breach Response

If ZibaGo becomes aware of a personal data breach, it will assess and respond to the incident in accordance with applicable law, including applicable notification, mitigation, recordkeeping and cooperation requirements. Where legally required, affected individuals and/or the competent authority will be notified through appropriate channels.

14. Data Retention

ZibaGo retains personal data only for as long as reasonably necessary for the purposes for which it was collected, for the duration of the customer or partner relationship, and for legitimate business, accounting, tax, insurance, dispute-resolution, fraud-prevention, legal or regulatory requirements.

Different records may therefore have different retention periods. For example, booking and transaction records may need to be retained longer than routine website analytics. When information is no longer required, ZibaGo will seek to delete it, anonymize it or otherwise handle it in accordance with applicable law and its retention procedures.

15. Cookies and Similar Technologies

ZibaGo may use cookies, local storage, pixels, SDKs and similar technologies to keep the website or application functional, remember preferences, understand usage, improve performance and, where permitted, support marketing or advertising.

Where required, ZibaGo will provide appropriate cookie choices or notices. Users can also manage certain cookie settings through their browser or device, although disabling essential technologies may affect service functionality.

16. User Rights and Requests

Subject to applicable law, individuals may have rights relating to their personal data, which may include requesting access to information about processing, correction or updating of inaccurate information, erasure where applicable, withdrawal of consent where processing relies on consent, and grievance redressal.

Requests should be made through the contact details published by ZibaGo. ZibaGo may need to verify the requester's identity before acting on a request, particularly where disclosure could expose another person's information or create a security risk.

Rights may be subject to lawful exceptions, including requirements to retain information for legal claims, fraud prevention, security, regulatory compliance or other purposes permitted by law.

17. Grievance Redressal and Privacy Contact

For privacy questions, requests or complaints, individuals may contact ZibaGo using the details below:

Privacy / Grievance Contact: [Name / Designation]
Email: [privacy@zibago.com — replace with active address]
Phone: [Official ZibaGo support number]
Business Address: [Insert exact legal/business address]

ZibaGo will endeavor to acknowledge and address legitimate privacy-related requests within the timeframes required by applicable law or its published procedures.

18. Children's Data

ZibaGo's self-drive rental service is intended for persons who are legally eligible to rent and operate the relevant vehicle. ZibaGo does not knowingly solicit unnecessary personal data from children for the purpose of enabling self-drive vehicle rental.

If ZibaGo becomes aware that personal data has been collected from a child in circumstances where collection or processing is not permitted, it will take appropriate steps as required by applicable law.

19. Third-Party Links and Services

The ZibaGo platform may contain links or integrations to third-party websites, applications or services. ZibaGo is not responsible for the privacy practices of independent third parties. Customers should review the privacy notices of those services before providing information directly to them.

20. Data Accuracy

Customers and vehicle partners are responsible for providing accurate, current and complete information where required. Providing false, misleading, forged or materially incomplete documentation may result in booking refusal, account restriction, termination of service, recovery action or reporting to competent authorities where appropriate and lawful.

21. Automated Decision-Making and Human Review

ZibaGo may use automated tools, rules, verification systems or risk signals to assist with fraud prevention, document verification, account security and operational decisions. Automated checks may produce false positives or require additional information.

Where appropriate and required by law, ZibaGo may provide a channel for review, verification or grievance regarding a material decision. ZibaGo does not intend to make unlawful discriminatory decisions based on protected characteristics.

22. Account Suspension and Data Preservation

If ZibaGo reasonably suspects fraud, identity misuse, unauthorized access, vehicle theft, document forgery, serious contractual violation or other material risk, it may suspend or restrict an account while investigating, subject to applicable law.

ZibaGo may preserve relevant records during an investigation, dispute, insurance claim or legal process even if a customer requests deletion, where retention is legally required or otherwise permitted.

23. Marketing Preferences

Customers may receive essential transactional messages such as booking confirmations, pickup instructions, payment notifications, safety notices and account-security alerts. These are distinct from optional promotional communications.

Where marketing communications are sent, ZibaGo will provide appropriate unsubscribe or preference mechanisms where required. Opting out of marketing does not prevent ZibaGo from sending essential service or legally required communications.

24. Changes to This Privacy Policy

ZibaGo may update this Privacy Policy to reflect changes in its services, technology, legal requirements, regulatory guidance or business operations. The revised version will be published through the relevant ZibaGo platform and will state its effective date.

Where a change materially affects how personal data is processed and applicable law requires notice or consent, ZibaGo will take the steps required by law.

25. Governing Law and Interpretation

This Privacy Policy is intended to operate in accordance with the laws applicable to ZibaGo and its services in India. If any provision of this Policy is found to be invalid or unenforceable, the remaining provisions will continue to the extent permitted by law.

Nothing in this Policy replaces or limits the rights available to an individual under applicable law.

26. Contact and Company Details

ZibaGo / ZibaGo SelfDrive

Legal Entity: [Insert exact legal entity name]

Business / Registered Address: [Insert exact address]

Website: [Insert official ZibaGo website]

Privacy Email: [Insert official privacy email]

Customer Support: [Insert official support number]

Document status: Version 1.0 • Effective date: 9 August 2026

27. Practical Privacy Notice at Booking

For transparency, ZibaGo should present a short privacy notice at or before the point where a customer submits personal information. The notice should clearly identify the categories of personal data being collected and the principal purposes, and should provide access to this full Privacy Policy.

Suggested short notice: “ZibaGo collects and processes your personal information, identity and driving documents, booking and transaction details, and other relevant information to verify eligibility, process your rental, maintain safety and security, prevent fraud and misuse, provide support, comply with law, and protect customers and vehicle owners. See the full Privacy Policy for details.”

28. Customer Acknowledgement

By using ZibaGo's website, application or rental services, a person acknowledges that they have been provided access to this Privacy Policy. Where consent is required for a particular processing activity, ZibaGo will obtain consent through an appropriate mechanism rather than treating this general acknowledgement as unlimited consent.

Customers should read this Policy together with the Terms & Conditions and the specific notices presented during KYC, booking, payment, vehicle pickup and other stages of the rental journey.

LEGAL REVIEW & IMPLEMENTATION CHECKLIST

Before publishing this document, ZibaGo should verify:

- Exact legal entity name and registered/business address.
- Active privacy/grievance email and customer-support contact.
- Actual payment gateway(s), KYC provider(s), hosting/database provider(s), communication tools and analytics tools.
- Whether ZibaGo vehicles use GPS/telematics and what data those systems actually generate.
- Actual retention periods for KYC, booking, payment, incident and vehicle-tracking records.
- Actual customer eligibility rules, verification workflow and refusal/suspension process.
- Insurance arrangements and information-sharing requirements.
- Current applicability and enforcement timeline of the DPDP Act and DPDP Rules to ZibaGo's specific processing activities.
- Final legal review by an India-qualified lawyer before the policy is relied upon as a contractual/legal document.
